PRESS RELEASE

ARC-GEN'S DEBBIE CELEBRATES SILVER ANNIVERSARY

Debbie McCormack, personal assistant to the directors at Wolverhampton based on-site power equipment supplier Arc-Gen, is celebrating 25 years of dedicated service with the company.

To mark the occasion, Debbie has been recognised for her hard work and staying power by being presented with a gold watch from Bill Morris, Chairman of Arc-Gen's parent company, the Morris Company.

"People now tend to change their jobs much more frequently," commented Bill Morris. "It is important to recognise and thank dedicated staff like Debbie who remain loyal to the same company for so many years."

Debbie has also been given the full five-star treatment by her colleagues with champagne, flowers and a special celebration cake.

She commenced her employment as an office junior in late 1981 when the company was based in Coven and has risen to become the 'right hand woman' to managing director Mark Hodgkins and sales director Andy Munford.

Debbie commented: "Office life has changed significantly over the years, especially on the technology side. There were no computers, email or mobile phones when I started here, just typewriters and a telex.

"It's also been great to be part of an organisation which has grown into a very successful company."

Andy Munford added: "It's been a pleasure working with Debbie and she has undoubtedly made a huge contribution to our business. We're delighted to mark her silver anniversary with us and hope she'll remain part of the team for many more years to come."

Widely recognised as being one of the UK's leading specialists of on-site generation equipment, Arc-Gen's main product ranges include mobile generators, welders, lighting towers and plasma cutters which are supplied to the rental, construction and fabrication markets.

Established for more than 30 years, the company operates from a 3,000 sq m facility in Four Ashes, near Wolverhampton. Accredited with ISO 9001, Arc-Gen's staff includes fully trained engineers offering expert advice, service and repairs to any aspect of the product range.
