## **ARC-GEN COMPANY PROFILE**

Arc-Gen is widely recognised as the UK's supplier of premier on-site generation equipment.

The company's main product ranges include mobile generators, welders, lighting towers and plasma cutters. Having recently acquired Hilti TW, the company also supplies a range of water pumps and pressure washers.

Arc-Gen operates from a 3,000 sq m facility in Four Ashes, near Wolverhampton and has built a reputation for quality and service in today's rental, construction and fabrication markets. Designed for total reliability, the company says its products are fully proven in the marketplace and meet the most exacting applications in the most difficult conditions.

It is also establishing a reputation for its environmental credentials having won the 2008 Green Zone Award for its Weldmaker 300AVC at the annual Executive Hire News Trade Show. The machine was recognised for its low emissions, high fuel efficiency and its low noise output, all of which contribute to an improved carbon footprint and impact on the environment.

Accredited with ISO 9001, Arc-Gen's staff include fully trained engineers offering on-site expert advice, service and repairs to any aspect of the product range. Arc-Gen also offers after sales and service for its customers with the complete range of spare parts for all machines, including engine parts, stocked at the Four Ashes facility.
